

# **Project Title**

One Paragraph of project description goes here

## **Getting Started**

These instructions will get you a copy of the project up and running on your local machine for development and testing purposes. See deployment for notes on how to deploy the project on a live system.

## **Prerequisites**

What things you need to install the software and how to install them  
Give examples

## **Installing**

A step by step series of examples that tell you how to get a development env running

Say what the step will be

Give the example

And repeat

until finished

End with an example of getting some data out of the system or using it for a little demo

## **Running the tests**

Explain how to run the automated tests for this system

## **Break down into end to end tests**

Explain what these tests test and why

Give an example

## **And coding style tests**

Explain what these tests test and why

Give an example

## **Deployment**

Add additional notes about how to deploy this on a live system

## **Built With**

## **Contributing**

Please read for details on our code of conduct, and the process for submitting pull requests to us.

## **Versioning**

We use SemVer for versioning. For the versions available, see the repository.

## **Authors**

See also the list of contributors who participated in this project.
